Phone response

From: David Robbins

My mother lives in Montgomery and recently suffered hail damage to her new Ford automobile. A friend at a local dealership told us about Dentmax and they were able to get all of the dents out on the trunk top and hood of her car without any signs of crumpled paint.

I would highly recommend the technicians at Dentmax in the case of dent repair. We would have paid a high price for regular bodywork to fix the problems. It is a very unique system.
